Ali Asker

Ottawa, ON • 819-830-0157 • a.asker04@yahoo.com • github.com/Ali-Asker

PROFILE

Computer Engineering Technology student with two years of cybersecurity compliance experience and a Government of Canada Reliability Status clearance. Combines ISO 27001 and secure cloud work with hands-on development in Flutter/Go web apps, Jakarta EE back ends and Arduino-based embedded systems.

EDUCATION

Algonquin College | Ottawa, ON 2024 – 2027 (expected)
Advanced Diploma, Computer Engineering Technology – Computing Science
Relevant coursework: Embedded Systems, Enterprise Java (Jakarta EE), Business Intelligence & Data Analytics

EXPERIENCE

Cybersecurity Compliance Analyst | Sabytel Technologies Inc., Ottawa, ON 2023 – 2025

- Assessed client environments against ISO 27001 controls and recommended remediation for compliance gaps.
- Implemented secure remote access (VPN) and multi-network segmentation to isolate sensitive systems.
- Built and maintained secure cloud infrastructure, hardening configurations against known vulnerabilities.
- Consulted for multiple clients on strengthening their security infrastructure and compliance posture.

Sales & Computer Specialist | Best Buy, Ottawa, ON 2020 – 2023

- Diagnosed and resolved customer issues with computer components and peripherals.
- Recommended hardware and IT solutions matched to each customer's technical needs and budget.
- Explained technical trade-offs in plain language to non-technical customers.

PROJECTS

Renthen – Peer-to-Peer Rental Marketplace | *Flutter, Dart, Go* renthen.com

- Built a full-stack rental marketplace with a Flutter front end and a Go back end, tested end to end.
- Delivered 10+ screens with multi-language support, integrated maps, light/dark theming and animations.
- Applied established design patterns with clear separation of concerns to support team-scale development.

Cold Box – Cold-Chain Delivery Locker | *C/C++, Arduino, Node-RED*

- Built a dual Arduino MEGA locker linked over I2C, with temperature sensing, PWM fan control, servo lock and keypad entry.
- Added PIR and ultrasonic presence detection and a Node-RED dashboard for live monitoring.
- Resolved an interrupt conflict between the Servo library and Timer1 by migrating the timing ISR to Timer2.

Bouncer – Jakarta EE Web Application | *Java, JSF, JPA, REST, Glassfish*

- Built a web game with JSF, JPA persistence on Apache Derby, and REST endpoints tested in Postman.
- Fixed build and deployment failures, including self-referencing Maven dependency and WEB-INF access.

TECHNICAL SKILLS

Languages: Java, C/C++, Go, Dart, SQL, HTML/CSS/JavaScript
Frameworks & Platforms: Flutter, Jakarta EE (JSF, JPA, REST), Arduino, Node-RED
Cloud & Security: AWS, Azure, ISO 27001, VPN, network segmentation
Tools: Linux, VS Code, Visual Studio, IntelliJ, Goland, Android Studio, Maven, Postman, RapidMiner

CERTIFICATIONS & CLEARANCE

Government of Canada Reliability Status Security Clearance 2024
